Miss Marjorie Boselly, Station Mgr.,  
Intercollegiate Broadcasting System  
Chapin House - Smith College  
Northampton, Massachusetts

Dear Miss Boselly:

Replying to your letter of October 24 reference to utilization of electric distribution equipment in connection with broadcasting. I will be in Northampton around noontime on Tuesday - November 4, and should be pleased to discuss this matter with you.

I am a little at a loss to understand exactly what you wish to do. If it is a matter of utilizing empty conduits in the distribution system, there certainly can be no objection to this. If it is a matter of connecting a carrier system to the conductors of the new distribution system, we should object to this being done prior to the turning over of the equipment to the College.

Undoubtedly you appreciate that the new distribution system is incomplete and will not be put into service until sometime in December, and until it is put into service we could not permit any connections to be made to it which might complicate our final tests.

Very truly yours,

*Alfred J. Hixon*
